Answer the questions! Circle the correct answer to each question!

Why does a female snowy owl have dark spots on her feathers?

- a) The spots stun their prey
- b) The female with the darkest spots gets to mate with the strongest male
- c) Snowy owls nest on the ground and the spots help them blend in with the dirty snow

Why do porcupines have striped needles?

- a) The striped needles warn and scare away predators
- b) The long needles help them climb trees
- c) The white on the needles help them find one another at night

Why do tigers have stripes?

- a) Stripes help tigers blend in with their surroundings and stay unnoticed by their prey when they are crouching
- b) The stripes' bright colours help attract wild boars and deer
- c) The stripes allow the tigers to recognize one another

Why do bumblebees have fluffy, striped bodies?

- a) The fluff on their bodies protects them when they fall and the stripes help them blend in with the surrounding meadow
- b) The stripes help bumblebees mimic stinging bees and wasps to scare away predators and the fluff helps them collect pollen
- c) The stripes help them attract bees of the opposite sex and the fluff makes them look bigger in order to scare off predators
